REBATES GUIDE · WESTERN AUSTRALIA

Every rebate on solar & batteries – and the 0% loan

Three rebates stack, and we take them all straight off your quote – you never pay full price and wait for money back.

1 Federal solar rebate

STCs

Your solar panels earn certificates based on the system's size and where you live. They're worth roughly **$1,700 on a 6.6 kW system** in Perth.

It steps down every 1 January until it ends in 2030 – the next drop is on **1 January 2027**.

2 Federal battery rebate

Cheaper Home Batteries

A discount per kWh of battery, about **$3,500 on a 13.5 kWh battery** at today's rates. Bigger batteries get a lower rate on the extra kWh.

The rate is reviewed every six months, so it can change between your quote and your install – we use the rate on the day it's installed.

3 WA Residential Battery Scheme

An extra state rebate on top of the federal one, when you join your retailer's virtual power plant (VPP):

YOUR POWER RETAILER	WA REBATE	INTEREST-FREE LOAN
Synergy (Perth & South West)	**$130 per kWh – up to $1,300**	up to $10,000
Horizon Power (regional WA)	**$380 per kWh – up to $3,800**	up to $10,000

The battery needs at least 5 kWh of usable storage; the maximum is reached at 10 kWh. One rebate per property. Joining the VPP lets your retailer draw a little power from your battery at busy times – you keep using it as normal.

Example: 6.6 kW solar + 13.5 kWh battery

REBATE	SYNERGY CUSTOMER	HORIZON POWER CUSTOMER
Federal solar (STCs)	$1,710	$1,710
Federal battery	$3,490	$3,490
WA battery rebate	$1,300	$3,800
Total off the price	**about $6,500**	**about $9,000**

What you need to do

- ✓ Send us a recent power bill – it tells us your retailer and how much you use
- ✓ Agree to join your retailer's VPP (for the WA rebate or the loan)
- ✓ If you rent, get your landlord's written OK
- ✓ **Tell us if you want the interest-free loan – see over the page**

We handle the rest – every rebate claim, the loan application, and the Synergy and Western Power paperwork.

WA GOVERNMENT INTEREST-FREE LOAN

Pay it off over time – 0% interest

0% interest · no fees

Up to $10,000

Borrow $2,001 to $10,000 towards your battery and pay it back over 3 to 10 years – fixed at zero, no security, and only a late fee if a payment is missed.

$10,000 over 10 years
$83/month

over 5 years
$167/month

Under $210k
Household income (checked against tax returns)

Synergy or Horizon
You must be with one of them

Own or rent
Renters need the landlord's written OK

Join a VPP
Same as for the WA rebate

How it works

1. **Tell us you want it**
We lodge your quote with Plenti, the Government's loan partner.

2. **Plenti emails you**
Check it, confirm your ID and join the scheme online.

3. **Approved – we install**
Then we book your install. Applications last six months.

4. **We send the paperwork**
The invoice and the network approval go to Plenti.

5. **You confirm**
Plenti asks you to confirm you're happy with the install.

6. **Settled**
Plenti pays us, and your 0% repayments start.

Want the interest-free loan?

Scan the code or tap the button – three quick questions. Not a commitment; it just tells us to set it up.

Yes – I'm interested

Already have a quote from us? Tap "I'm interested in the loan" on your quote, or text Ben on 0406 882 870.

Good to know: the loan plus the rebate can't be more than the price of the system. Approval is up to Plenti and isn't guaranteed. The property needs an ongoing internet connection. Late fee: $10 a week in arrears, capped at $120 in any 12 months. Places are limited. Figures as of November 2026 and can change – your quote shows the exact rebates on the day. Federal rebates are certificates whose market price moves.
